# Brand guidelines for merchants

How to use Koko's name, logo, colours and artwork in your marketing.

## Logo

Use the logo on white or light backgrounds. Leave clear space around it at least as wide as the letter O. Don't recolour, stretch, rotate or add effects.

## Colours

**Koko pink**
#FFBCD9

**Koko blue**
#021FA3

**Koko cyan**
#00DAD6

## Typeface

Plus Jakarta Sans. Use it for headlines and short text next to Koko artwork.

## Artwork

Keep the original colours and proportions. Don't add text over the artwork. Crop from the edges, not the centre.

## Choosing a file

Each asset lists what its versions are best for. Use the web versions online, they load faster. Use the full-resolution files for print.

## Campaign assets

Campaign artwork shows specific dates and offers. Share it only while the campaign runs. Downloads turn off when a campaign ends.

## Payments

Artwork with a QR code is decorative. If customers need to pay, add your own Static QR from the Static QR page in the merchant portal.

## Need something else?

For co-branded material or a size that isn't here, ask your Koko account manager.
